

OUTPUT:

The image displays two screenshots of a web application titled "AI Learning & Study Assistant". The browser's address bar shows the URL "c0954d6837939af8c0.gradia.live".

Top Screenshot: The "Ask AI" tab is active. The interface includes a text input field with the question "What is machine learning?" and a "Generate Answer" button. Below the input, the answer is displayed: "Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to learn complex patterns." A "Recent Memory" section lists four previous questions and answers, all related to machine learning and deep learning.

Bottom Screenshot: The "Learning Plan" tab is active. The interface includes two input fields: "Enter Topic" (with the value "AI") and "Number of Days" (with the value "3"). A "Create Plan" button is located below these fields. Below the button, a "3-Day Learning Plan" is displayed, detailing the topics and study time for each day.

3-Day Learning Plan

Topic: AI

Day 1

- Learn the basic concepts. Study: 1 hour

Day 2

- Study important definitions and examples. Study: 1 hour

Day 3

- Practice basic questions. Study: 1 hour

Top Screenshot: Generate Quiz

- Header:** AI Learning & Study Assistant
- Sub-header:** RAG + Memory + Tools
- Description:** Ask questions, create learning plans and generate quizzes.
- Navigation:** Ask AI, Learning Plan, **Generate Quiz**, Memory
- Form:** "Enter Quiz Topic" with the input "Deep learning".
- Button:** Generate Quiz
- Section:** Quiz
- Topic:** Deep learning
- Question 1:** What is the main concept discussed in the study material?
- Answer:** Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to learn complex patterns.
- Question 2:** Explain this topic in your own words.

Bottom Screenshot: Memory

- Header:** AI Learning & Study Assistant
- Sub-header:** RAG + Memory + Tools
- Description:** Ask questions, create learning plans and generate quizzes.
- Navigation:** Ask AI, Learning Plan, Generate Quiz, **Memory**
- Button:** Show Memory
- Section:** Recent Memory
- 1. Question:** What is Machine Learning?
Answer: Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to learn complex patterns.
- 2. Question:** Ineed studt
Answer: Sorry, I could not find this topic in my study material.
- 3. Question:** Ineed study
Answer: Sorry, I could not find this topic in my study material.
- 4. Question:** Deep learning
Answer: Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to learn complex patterns.
- 5. Question:** What is machine learning?
Answer: Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to learn complex patterns.
- Button:** Clear Memory
